### [Like to Read](#)

When working with my students, I identify 9 goals - 9 units of study. Students use several strategies at once naturally and should not be limited to discussing one strategy only. Whereas the proficient reader strategies cannot be taught in isolation, it is helpful to identify a strategy a month on which to focus. It takes 4-6 weeks to study ONE strategy. Students need the in-depth study.

The teacher should use mini-lessons and small groups to teach, demonstrate and investigate together how to use these strategies. Eventually, students understand the reading strategies and have the confidence to know when to apply each one.

**IMPORTANT NOTE:** There is no order for teaching these strategies, since we use them all at once anyway.

1. Children will [use a variety of fix-up strategies](#) to read unfamiliar words. Students will learn to pronounce words, determine meanings in context, and figure out words using knowledge of root words, prefixes and suffixes, among other strategies. They will learn to figure out the meaning of an unfamiliar word. Sometimes that results from figuring out how to pronounce the word. Sometimes that is by inferring from context. Of the two skills, students need to know that figuring out the meaning is more important.
2. Children will deepen their comprehension by [accessing their prior knowledge](#) before reading a selection. While reading, they will learn to [make connections](#) from the text to themselves, the text to other texts and movies, and the text to world. By recognizing what is unknown in the text and thinking about what is known from personal experience, other texts and the world, the reader will build confidence in using personal connections to get meaning from what was originally unknown. By explaining how these connections help them understand the text, their comprehension will improve.
3. Students will build on their knowledge of [retelling](#) to recall important details. Students will learn to discern what is most important to use in the retelling.
4. Students will learn to [summarize](#) a small selection in as few words as possible. Students will break longer selections into smaller parts and summarize as they read. By summarizing in this headline-writing fashion, students will begin to sort out main ideas from details of the text.

5. Students will learn to [ask questions](#) before, during and after reading and to seek answers to deepen their understanding of the text. By bringing their own questions to small groups, students will examine what they don't know and get help in comprehending.
6. Students will learn to [visualize](#) the details of a text. They will use other sensory images like dramatizing and drawing to help them better understand what they are reading.
7. Children will learn to [infer \(and predict\)](#) information before, during, and after reading. Children will learn to distinguish between inferences, assumptions, and opinions by backing up their conclusions with evidence.
8. Children will be able to [discriminate what is important from what is not](#). Children will be able to use this information to [determine main ideas and themes](#) of texts.
9. Students will stop often while reading to [synthesize](#) the information gained from texts to form opinions, change perspectives, develop new ideas, find evidence, and, in general, enhance a personal understanding of the concepts presented in a text.

## Like to Read

When working with my students, I identify 9 goals - 9 units of study. Students use several strategies at once naturally and should not be limited to discussing one strategy only. Whereas the proficient reader strategies cannot be taught in isolation, it is helpful to identify a strategy a month on which to focus. It takes 4-6 weeks to study ONE strategy. Students need the in-depth study.

**IMPORTANT NOTE:** If you are in a school where many or all teachers are setting up proficient reader classrooms, you will no longer need this monthly timeline. When your kids come to you with a great working understanding of a strategy, you will only need to fine-tune with harder texts. That will give you more time to work on the more difficult strategies like determining importance and synthesis. And remember, THERE IS NO ORDER FOR TEACHING THESE STRATEGIES. Since we use them all at once anyway, create a timeline that works for you.

1. Children will [use a variety of fix-up strategies](#) to read unfamiliar words. Students will learn to pronounce words, determine meanings in context, and figure out words using knowledge of root words, prefixes and suffixes, among other strategies. They will learn to figure out the meaning of an unfamiliar word. Sometimes that results from figuring out how to pronounce the word. Sometimes that is by inferring from context. Of the two skills, students need to know that figuring out the meaning is more important.
2. Children will deepen their comprehension by [accessing their prior knowledge](#) before reading a selection. While reading, they will learn to [make connections](#) from the text to themselves, the text to other texts and movies, and the text to world. By recognizing what is unknown in the text and thinking about what is known from personal experience, other texts and the world, the reader will build confidence in using personal connections to get meaning from what was originally unknown. By explaining how these connections help them understand the text, their comprehension will improve.
3. Students will build on their knowledge of [retelling](#) to recall important details. Students will learn to discern what is most important to use in the retelling.
4. Students will learn to [summarize](#) a small selection in as few words as possible. Students will break longer selections into smaller parts and summarize as they read. By summarizing in this headline-writing fashion, students will begin to sort out main ideas from details of the text.
5. Students will learn to [ask questions](#) before, during and after reading and to seek answers to deepen their understanding of the text. By bringing their own questions to small groups, students will examine what they don't know and get help in comprehending.
6. Students will learn to [visualize](#) the details of a text. They will use other sensory images like dramatizing and drawing to help them better understand what they are reading.

7. Children will learn to [infer \(and predict\)](#) information before, during, and after reading. Children will learn to distinguish between inferences, assumptions, and opinions by backing up their conclusions with evidence.
8. Children will be able to [discriminate what is important from what is not](#). Children will be able to use this information to [determine main ideas and themes](#) of texts.
9. Students will stop often while reading to [synthesize](#) the information gained from texts to form opinions, change perspectives, develop new ideas, find evidence, and, in general, enhance a personal understanding of the concepts presented in a text.

## Like to Read

When working with my students, I identify 9 goals - 9 units of study. Students use several strategies at once naturally and should not be limited to discussing one strategy only. Whereas the proficient reader strategies cannot be taught in isolation, it is helpful to identify a strategy a month on which to focus. It takes 4-6 weeks to study ONE strategy. Students need the in-depth study

**IMPORTANT NOTE:** If you are in a school where many or all teachers are setting up proficient reader classrooms, you will no longer need this monthly timeline. When your kids come to you with a great working understanding of a strategy, you will only need to fine-tune with harder texts. That will give you more time to work on the more difficult strategies like determining importance and synthesis. And remember, THERE IS NO ORDER FOR TEACHING THESE STRATEGIES. Since we use them all at once anyway, create a timeline that works for you.

1. Children will [use a variety of fix-up strategies](#) to read unfamiliar words. Students will learn to pronounce words, determine meanings in context, and figure out words using knowledge of root words, prefixes and suffixes, among other strategies. They will learn to figure out the meaning of an unfamiliar word. Sometimes that results from figuring out how to pronounce the word. Sometimes that is by inferring from context. Of the two skills, students need to know that figuring out the meaning is more important.
2. Children will deepen their comprehension by [accessing their prior knowledge](#) before reading a selection. While reading, they will learn to [make connections](#) from the text to themselves, the text to other texts and movies, and the text to world. By recognizing what is unknown in the text and thinking about what is known from personal experience, other texts and the world, the reader will build confidence in using personal connections to get meaning from what was originally unknown. By explaining how these connections help them understand the text, their comprehension will improve.
3. Students will build on their knowledge of [retelling](#) to recall important details. Students will learn to discern what is most important to use in the retelling.
4. Students will learn to [summarize](#) a small selection in as few words as possible. Students will break longer selections into smaller parts and summarize as they read. By summarizing in this headline-writing fashion, students will begin to sort out main ideas from details of the text.
5. Students will learn to [ask questions](#) before, during and after reading and to seek answers to deepen their understanding of the text. By bringing their own questions to small groups, students will examine what they don't know and get help in comprehending.
6. Students will learn to [visualize](#) the details of a text. They will use other sensory images like dramatizing and drawing to help them better understand what they are reading.

7. Children will learn to [infer \(and predict\)](#) information before, during, and after reading. Children will learn to distinguish between inferences, assumptions, and opinions by backing up their conclusions with evidence.
8. Children will be able to [discriminate what is important from what is not](#). Children will be able to use this information to [determine main ideas and themes](#) of texts.
9. Students will stop often while reading to [synthesize](#) the information gained from texts to form opinions, change perspectives, develop new ideas, find evidence, and, in general, enhance a personal understanding of the concepts presented in a text.

## [Like to Read](#)

When working with my students, I identify 9 goals - 9 units of study. Students use several strategies at once naturally and should not be limited to discussing one strategy only. Whereas the proficient reader strategies cannot be taught in isolation, it is helpful to identify a strategy a month on which to focus. It takes 4-6 weeks to study ONE strategy. Students need the in-depth study.

**IMPORTANT NOTE:** If you are in a school where many or all teachers are setting up proficient reader classrooms, you will no longer need this monthly timeline. When your kids come to you with a great working understanding of a strategy, you will only need to fine-tune with harder texts. That will give you more time to work on the more difficult strategies like determining importance and synthesis. And remember, THERE IS NO ORDER FOR TEACHING THESE STRATEGIES. Since we use them all at once anyway, create a timeline that works for you.

1. Children will [use a variety of fix-up strategies](#) to read unfamiliar words. Students will learn to pronounce words, determine meanings in context, and figure out words using knowledge of root words, prefixes and suffixes, among other strategies. They will learn to figure out the meaning of an unfamiliar word. Sometimes that results from figuring out how to pronounce the word. Sometimes that is by inferring from context. Of the two skills, students need to know that figuring out the meaning is more important.
2. Children will deepen their comprehension by [accessing their prior knowledge](#) before reading a selection. While reading, they will learn to [make connections](#) from the text to themselves, the text to other texts and movies, and the text to world. By recognizing what is unknown in the text and thinking about what is known from personal experience, other texts and the world, the reader will build confidence in using personal connections to get meaning from what was originally unknown. By explaining how these connections help them understand the text, their comprehension will improve.
3. Students will build on their knowledge of [retelling](#) to recall important details. Students will learn to discern what is most important to use in the retelling.
4. Students will learn to [summarize](#) a small selection in as few words as possible. Students will break longer selections into smaller parts and summarize as they read. By summarizing in this headline-writing fashion, students will begin to sort out main ideas from details of the text.
5. Students will learn to [ask questions](#) before, during and after reading and to seek answers to deepen their understanding of the text. By bringing their own questions to small groups, students will examine what they don't know and get help in comprehending.
6. Students will learn to [visualize](#) the details of a text. They will use other sensory images like dramatizing and drawing to help them better understand what they are reading.

7. Children will learn to [infer \(and predict\)](#) information before, during, and after reading. Children will learn to distinguish between inferences, assumptions, and opinions by backing up their conclusions with evidence.
8. Children will be able to [discriminate what is important from what is not](#). Children will be able to use this information to [determine main ideas and themes](#) of texts.
9. Students will stop often while reading to [synthesize](#) the information gained from texts to form opinions, change perspectives, develop new ideas, find evidence, and, in general, enhance a personal understanding of the concepts presented in a text.

## Like to Read

When working with my students, I identify 9 goals - 9 units of study. Students use several strategies at once naturally and should not be limited to discussing one strategy only. Whereas the proficient reader strategies cannot be taught in isolation, it is helpful to identify a strategy a month on which to focus. It takes 4-6 weeks to study ONE strategy. Students need the in-depth study.

The teacher should use mini-lessons and small groups to teach, demonstrate and investigate together how to use these strategies. Eventually, students understand the reading strategies and have the confidence to know when to apply each one.

**IMPORTANT NOTE:** There is no order for teaching these strategies. since we use them all at once anyway.

1. Children will [use a variety of fix-up strategies](#) to read unfamiliar words. Students will learn to pronounce words, determine meanings in context, and figure out words using knowledge of root words, prefixes and suffixes, among other strategies. They will learn to figure out the meaning of an unfamiliar word. Sometimes that results from figuring out how to pronounce the word. Sometimes that is by inferring from context. Of the two skills, students need to know that figuring out the meaning is more important.
2. Children will deepen their comprehension by [accessing their prior knowledge](#) before reading a selection. While reading, they will learn to [make connections](#) from the text to themselves, the text to other texts and movies, and the text to world. By recognizing what is unknown in the text and thinking about what is known from personal experience, other texts and the world, the reader will build confidence in using personal connections to get meaning from what was originally unknown. By explaining how these connections help them understand the text, their comprehension will improve.
3. Students will build on their knowledge of [retelling](#) to recall important details. Students will learn to discern what is most important to use in the retelling.
4. Students will learn to [summarize](#) a small selection in as few words as possible. Students will break longer selections into smaller parts and summarize as they read. By summarizing in this headline-writing fashion, students will begin to sort out main ideas from details of the text.
5. Students will learn to [ask questions](#) before, during and after reading and to seek answers to deepen their understanding of the text. By bringing their own questions to small groups, students will examine what they don't know and get help in comprehending.
6. Students will learn to [visualize](#) the details of a text. They will use other sensory images like dramatizing and drawing to help them better understand what they are reading.

7. Children will learn to [infer \(and predict\)](#) information before, during, and after reading. Children will learn to distinguish between inferences, assumptions, and opinions by backing up their conclusions with evidence.
8. Children will be able to [discriminate what is important from what is not](#). Children will be able to use this information to [determine main ideas and themes](#) of texts.
9. Students will stop often while reading to [synthesize](#) the information gained from texts to form opinions, change perspectives, develop new ideas, find evidence, and, in general, enhance a personal understanding of the concepts presented in a text.

## Like to Read

When working with my students, I identify 9 goals - 9 units of study. Students use several strategies at once naturally and should not be limited to discussing one strategy only. Whereas the proficient reader strategies cannot be taught in isolation, it is helpful to identify a strategy a month on which to focus. It takes 4-6 weeks to study ONE strategy. Students need the in-depth study.

The teacher should use mini-lessons and small groups to teach, demonstrate and investigate together how to use these strategies. Eventually, students understand the reading strategies and have the confidence to know when to apply each one.

**IMPORTANT NOTE:** There is no order for teaching these strategies, since we use them all at once anyway.

1. Children will [use a variety of fix-up strategies](#) to read unfamiliar words. Students will learn to pronounce words, determine meanings in context, and figure out words using knowledge of root words, prefixes and suffixes, among other strategies. They will learn to figure out the meaning of an unfamiliar word. Sometimes that results from figuring out how to pronounce the word. Sometimes that is by inferring from context. Of the two skills, students need to know that figuring out the meaning is more important.
2. Children will deepen their comprehension by [accessing their prior knowledge](#) before reading a selection. While reading, they will learn to [make connections](#) from the text to themselves, the text to other texts and movies, and the text to world. By recognizing what is unknown in the text and thinking about what is known from personal experience, other texts and the world, the reader will build confidence in using personal connections to get meaning from what was originally unknown. By explaining how these connections help them understand the text, their comprehension will improve.
3. Students will build on their knowledge of [retelling](#) to recall important details. Students will learn to discern what is most important to use in the retelling.
4. Students will learn to [summarize](#) a small selection in as few words as possible. Students will break longer selections into smaller parts and summarize as they read. By summarizing in this headline-writing fashion, students will begin to sort out main ideas from details of the text.
5. Students will learn to [ask questions](#) before, during and after reading and to seek answers to deepen their understanding of the text. By bringing their own questions to small groups, students will examine what they don't know and get help in comprehending.
6. Students will learn to [visualize](#) the details of a text. They will use other sensory images like dramatizing and drawing to help them better understand what they are reading.

7. Children will learn to [infer \(and predict\)](#) information before, during, and after reading. Children will learn to distinguish between inferences, assumptions, and opinions by backing up their conclusions with evidence.
8. Children will be able to [discriminate what is important from what is not](#). Children will be able to use this information to [determine main ideas and themes](#) of texts.
9. Students will stop often while reading to [synthesize](#) the information gained from texts to form opinions, change perspectives, develop new ideas, find evidence, and, in general, enhance a personal understanding of the concepts presented in a text.
