

The construction of Toms River Intermediate East Outdoor Learning Center is well underway due to a generous \$10,000 grant from the Jay and Linda Grunin Foundation (Principal's Innovation Challenge Grant). This grant, along with a generous donation from our PTO, has enabled us to begin construction on an outdoor learning Center for our students.

This Outdoor Learning Center will provide a learning environment in which students, teachers, parents, and community members can participate in dynamic learning experiences designed to support current curriculums and inspire curiosity, collaboration, critical thinking, and problem-solving.

Our goal is to involve our school and community in the development of an area that is sustainable, helps reduce waste and greenhouse gases, and makes the world better for future generations.
