

# Is Your Child in Special Education?

Got plans for the road ahead after your student leaves school?

## Let Us Help!

All high school students are faced with a number of decisions as they make the transition from school to the relatively unfamiliar adult world. For high school students with developmental disabilities, it is vital that this planning and decision-making occur with the help of others and with as much information as possible.

## We Offer **FREE** to You:

- **Hands On Workshops**— Parent and students can learn from our Transition Navigators how to create a transition plan within the IEP, connect with the adult service system, and network with other families.
- **Wednesday Webinars Series**— Log on as our team of professionals provide important information that is archived on our website to help you navigate the resources in your community and create a plan to meet your students needs.
- **Help Desk Support**— Enter your questions related to general information, local resources, and supports and services in the adult service system.
