Intermediate East

The Science Fair at Intermediate East was a definite success this year! We would like to thank both parents and students for coming to the evening awards ceremony.

On March 16th, students who placed in the Intermediate East Science Fair will have the opportunity to participate in the Jersey Shore Science Fair at the Richard Stockton College of New Jersey. This is a wonderful experience, and students compete against peers from across the state in this respected event. Students will be able to attend the Jersey Shore Science Fair via a Toms River Schools bus, with the Science Fair directors acting as chaperones.

Students that place at the Jersey Shore Science Fair are then provided the chance to continue on to compete at the Delaware Valley Science Fair. This regional science fair draws students from many grade levels and multiple states. Students who qualify for this competition will be given additional information after participating at Stockton, and can be escorted to the Delaware Valley Fair by their parents. The Delaware Valley Fair will take place from April 2nd-4th. This is a highly competitive event, with the opportunity for students to win scholarship funding and prestigious awards from scientific organizations, corporations, colleges and universities.

Congratulations again to all students who participated in the Intermediate East Science Fair, and good luck in the state and regional competitions!

Many thanks again to Mrs. Phillips and Dr. Piznik for organizing our successful Science Fair and to all of the judges from our community.
