Philosophy, Mission and Vision

Philosophy: World languages education provides learners with the essential language skills and cultural understandings in languages other than English necessary to live and work in a global, culturally diverse world.

Mission: It is the mission of the World Language department to expose all students to the study of a second language enabling individuals to communicate face-to-face and by virtual means in appropriate ways with people from diverse cultures. World Language learning in Toms River Schools is designed to prepare students for a global economy by possessing the skills to become culturally aware citizens, empathetic towards varied cultural backgrounds, and flexible in cross-cultural interactions. Students will become proficient in the target language through instruction in the areas of speaking, listening, reading and writing and through authentic practice and cultural connections. Our proficiency goals are consistent with the standards set forth in the American Council for the Teaching of Foreign Languages (ACTFL).

Vision: Language learners are encouraged to take risks using the target language in a safe, collaborative environment that prepares them to communicate in a global world with people from diverse cultures, appreciating equally diverse perspectives. An education in world languages fosters a population that:

- Cultivates communication and cultural understanding in more than one language with the levels of language proficiency that are required to function in a variety of occupations and careers in the contemporary workplace. Exhibits attitudes, values, and skills that indicate a positive disposition and understanding of cultural differences and that enhances cross cultural communication.
- Participates in local and global communities with people who speak languages other than English to address social justice issues and other global problems.
- Values language learning for its long-term worth in advancing personal, work-related, and/or financial success in our increasingly interconnected world.

Course description and/or program overview:

In this introductory level of a world language the student will develop listening, speaking, reading and writing skills that will foster real-life communication. The culture of the specified language is embedded within the course materials. This course is part of the foundation for further study in the language.

Unit 1 Overview: Introduction to Spanish

Unit 1 Summary:

Unit Summary: This unit will develop language proficiency so students can effectively communicate ideas and information with peers using academic language and content-related vocabulary. The unit demonstrates how to integrate these domains with NJSL standards for Spanish language learners. Students are exposed to a variety of materials that offer them opportunities to tap into prior knowledge or build requisite background knowledge so they may engage with the various texts in the unit. Through the use of authentic literature students will be exposed to different kinds of texts. The different lessons and activities will expose students to literature, informational text and technology as required in the NJSL in order for students to use the four domains of listening, speaking, reading and writing; and the modes of interpersonal, presentational, and interpretive. The teacher scaffolds language so students can engage in discourse and higher order thinking skills.

Enduring Understandings:

- Identifying Spanish-speaking countries and recognizing cultural differences between these countries helps one gain new perspectives.
- Learning a different language enables us to be more tolerant of other cultures.
- People around the world greet each other in different ways.
- Communicating in more than one language unites our communities and enables us to become global citizens.

Essential Questions:

- How do I use another language to communicate with others?
- What can I learn about my own language and culture from the study of others?
- Why is it important to study a second language?
- How can exploring the Spanish speaking world make me more respectful and tolerant of other cultures?

Unit 3 Overview: Personal Characteristics

Unit 3 Summary: This unit will develop language proficiency so students can effectively communicate ideas and information with peers using academic language and content-related vocabulary. The unit demonstrates how to integrate these domains with NJSL standards for Spanish language learners. Students are exposed to a variety of materials that offer them opportunities to tap into prior knowledge or build requisite background knowledge so they may engage with the various texts in the unit. Through the use of authentic literature students will be exposed to different kinds of texts. The different lessons and activities will expose students to literature, informational text and technology as required in the NJSL in order for students to use the four domains of listening, speaking, reading and writing; and the modes of interpersonal, presentational, and interpretive. The teacher scaffolds language so students can engage in discourse and higher order thinking skills.

Enduring Understandings:

- Identifying Spanish-speaking countries and recognizing cultural differences between these countries helps one gain new perspectives.
- Learning a different language enables us to be more tolerant of other cultures.

Essential Questions:

- How do I use another language to communicate with others?
- What can I learn about my own language and culture from the study of others?
