Welcome to STEAM biology!

Biology is a challenging, intensive course where you’ll expand your prior biology knowledge and learn lots of exciting new things. As part of STEAM, you will also have a double lab period to put all that new knowledge to use. In order to be fully prepared for biology you are required to complete a summer assignment. The content of the assignment is all previous science knowledge learned throughout your academic career thus far. If you are not comfortable with the content, please take this opportunity to become comfortable. Please note, that there will only be a quick review of the content covered in the summer assignment and not in depth lessons on it.

The assignment is posted on the school website and my E-board (access directions below). You need to print out the assignment and answer all of the questions. If you do not know the questions use online resources, such as Khan Academy, to find the answers. As a STEAM student, you are expected to abide by the Academic Ethics Policy found in the school handbook. This means you are to complete this assignment individually.

The assignment is due on the first day of school; no late assignments will be accepted. It will count as a quiz grade.

I will be checking my e-mail periodically throughout the summer and if you have a specific question, please don’t hesitate to e-mail me. (agregorek@trschools.com)

I look forward to meeting you!

Ms. Gregorek

Directions to my E-board:
1. Go to trschools.com
2. Click on the Directory Button.
3. Under the title, there are four tabs. Select “E-board.”
4. Click on “High School East”
5. Scroll down the list until you see “Gregorek, Amanda” and select it.
6. You are now on my E-board page. Select the STEAM Bio tab, then the tab for Summer Assignment and you will an attachment called “STEAM_Biology Summer Assignment 2019-20” towards the bottom.
