

Summer Resources for Students

Below you will find a list of resources for students in all grade levels to help maintain student growth over the summer months.

Students will have access to iReady over the summer months. Please be sure your child is continuing to practice their skills. If and when technology allows, students are encouraged to use *i-Ready* at home; the program is available on most devices. With an average of 45 minutes of access per week, the assigned lessons are proven to help students grow academically, specifically when students move through the interactive activities and quizzes independently. We encourage parents to provide support for students when logging onto the website.
